Save Record Climb As Year’s End Nears

MAXWELL AFB, Ala. — Civil Air Patrol members from across the 50 states have recorded 31 lives saved as the volunteers moved into their last month of humanitarian services for 1975. Members from 7,033 units served 35,000 hours (as of Dec. 16, 1975) for the year.

One life was saved on Oct. 15 when Alaska's Rescue Coordination Center opened a mission after being informed of an overdue AR-15 aircraft with one person aboard on a flight to a lake 198 miles west of Fairbanks. A CAP aircraft from the Fairbanks unit was launched and located the downed aircraft by the signal from its emergency locator transmitter (ELT).

The pilot had flown the ski-equipped aircraft to the lake to do some work on his cabin and had broken through the thin ice while landing.

While an HH-3 helicopter from Fairbanks AFB was being scrambled to make the recovery, another aircraft was located crashed in the same lake. The pilot had landed his PA-12 on the lake to assist the first downed craft and also had broken through the ice.

Due to the cold, remoteness of the terrain and loss of survival gear, two saves were credited to CAP pilot Richard Burley of the Fairbanks unit who located both aircraft.

Three saves were chalked up by CAP ground teams on Oct. 24.

A Mississippi ground team was credited with saving the lives of two persons injured in an aircraft crash near McComb, Miss. The crash site was located by an employee of the Mississippi Fish and Game Department and the CAP ground team arrived on the scene and administered first aid until an ambulance arrived.

General Jones Expresses Pride In Address To Virginia Cadets

MILLER SCHOOL, Va. — The U.S. Air Force Chief of Staff, Gen. David C. Jones, told CAP cadets here, “We consider Civil Air Patrol a full part of the Air Force. We’re proud to have you wear the Air Force blue.”

General Jones addressed the school’s 80 CAP cadets, faculty, administrators and guests in a Veterans’ Day service in the school’s chapel.

The Miller School has changed its military program this year. The U.S. Army JROTC unit was disestablished in June 1975 and the school was chartered as a CAP squadron. The students, staff and faculty will now wear the CAP uniforms and participate in an aerospace oriented military training program. The science department will also offer an aerospace science course for credit.

“We will work with you in making this the finest CAP program in the entire country,” said General Jones who urged the school body to “come up with innovative ideas.” (See Jones Expresses, Page 2)

NEC Completes Title Changes

MAXWELL AFB, Ala. — The Dec. 13, 1975, National Executive Committee (NEC) has completed the National Board’s action which transferred the title National Commander from the Commander, CAP-USAF, to the National Chairman and changed the title of Vice Chairman to National Vice Commander.

The following titles are now effective:

- National Commander: Brig. Gen. William M. Patterson, CAP
- National Vice Commander: Col. Thomas C. Casaday, CAP
- Executive Director: Brig. Gen. Carl S. Miller, USAF
- National Administrator: Gordon T. Weir, USAF

CAKE CUTTING CEREMONY—Air Force Brig. Gen. Carl S. Miller, left, CAP executive director, and CAP Brig. Gen. William M. Patterson, national commander, prepare to cut the cake commemorating the remodeling of CAP’s National Book Store at Maxwell AFB. The opening coincided with the National Executive Committee meeting (NEC), which was held on Dec. 13. Members of the NEC were given a walk-thru of the facility. (Photo by MSgt. Russ Brown)
A NEW LOOK — Ruby McGee, left, and Donna Chambers put finishing touches on the new displays in CAP's National Book Store at Maxwell AFB. The store recently acquired additional space for its operation and was remodeled. CAP members who visit the store will now have the opportunity to view the many CAP items available for purchase. Air Meets Slated

Competition To Select U.S. Team

WASHINGTON, D.C. — The National Pilots Association and the National Intercollegiate Flying Association will again sponsor light aircraft precision flight competitions leading to the selection of a U.S. Team for the 1977 World Championships.

Five regional air meets will be scheduled during the fall of 1976 and spring of 1977. A National Fly-off will be conducted at a central U.S. location in the late spring of 1977.

Regional air meets will be hosted by college flying clubs at five different locations throughout the country. Competition will be open to all pilots who hold a private pilot certificate and have at least 100 pilot hours logged. Pilots will fly competition events solo in single-engine, light aircraft.

The top scoring 10 per cent of the contestants registered at each regional air meet will be invited to participate in the National Fly-off. (A minimum of 5 pilots will be invited from each regional.) No pilot may participate in more than one regional meet.

The National Fly-off will be the final competition and the top scoring four finalists will be invited to make up the U.S. Precision Flight Team for 1977. These four pilots will represent the United States in the second World Championships of Light Airplane Piloting to be held in Linz, Austria, in August 1977. The Team members will receive an expense paid trip to Europe for the world event.

Light airplane precision flight competition tests the skill of pilots in performing routine flying maneuvers with emphasis on technique and accuracy. Events consist of power-on and power-off spot landings and a cross-country navigation flight. All performances are judged and scored by a team of judges, strategically located to permit close observation and measurement of each event.

Landing and navigation event scores are melded into a composite score for each contestant. Winners are selected from the top scoring pilots in each regional air meet. Regional winners are finalists and compete among themselves for a berth on the U.S. Team.

Montana Cadets Hold School

FT. HARRISON, Mont. — Cadets from throughout Montana gathered here recently for their first Wing Leadership School.

A combination of training exercises and ideas including daily physical training, formations, proper wear of the uniform, CAP customs and courtesies and communications made the school a success.

In addition to bringing out and enhancing the leadership knowledge of the cadets, the school also helped build self and group discipline in the cadets.

The commandant of cadets for the school was Cadet Col. Randall Wostel. The Honor Cadre consisted of Cadets Col. Steven Smith, guest from Utah, Lt. Col. Byron Collison and Capt. Kathy Hart.

Capt. Fallows and guests to the school were Cadet Col. Michael Foster, Colorado Wing, and Lt. Col. Fallows from the Rocky Mountain Region.

Jones Expresses Pride

(Continued from Page 1)

ideas, move out and set the standard for others to meet."

In fulfilling the cadet program's role of character building and leadership training, self-discipline is extremely important the Air Force chief told the students.

He showed the audience slides of air Force aircraft, uniforms and discipline, and talked about the recruiting emphasis on student pilots.

One survivor was suffering from severe head injuries and the pilot had two broken arms. As the result of the rapid response and on-scene first aid, the Mississippi Wing was credited with two saves.

A Wyoming CAP ground team was instrumental in saving the life of a young hunter who had become lost on a hunting trip with his father Oct. 23.

When located the following day by the ground team, the hunter, who was mentally retarded, was in good condition although light snow had fallen and temperatures were near freezing during the night.

A CAP ground team from Oregon's Wing was credited Nov. 8 with saving the life of a missing hunter near Hood River, Ore.

CAP and the Hood County Sheriff's Department launched the rescue effort after two 17-year-old boys from Hood River were reported missing while on a hunting trip. The survivors were spotted by a volunteer aircraft working with the sheriff. Their position was radiated to the CAP ground unit, located only 150 yards from the scene, which effected the find and recovery.

CAP was credited with the save as one of the two hunters was suffering from exposure.

Members of the Sitka, Alaska, CAP unit concluded a successful two-day search Dec. 16 for an overdue boat and thereby recorded CAP's 50th and 51st lives saved.

The search and rescue mission was initiated Dec. 15 when the United States Coast Guard requested CAP assistance to search for an overdue 26-foot boat in the Sitka area. Several CAP light aircraft along with Coast Guard resources were launched and conducted a search of a 225 square mile area the first day with negative results.

At first light the following day, the Sitka CAP and a Coast Guard HH-3 helicopter started searching again. A CAP aircraft, piloted by Cecil McClain, spotted the two people on a beach on the east side of Krestof Island.

Carl Southbloom and his son had rowed ashore after their boat capsized and broke up. The uninjured persons were picked up by helicopter and transported to the Sitka Hospital.

Due to the weather conditions, remoteness of the wreckage and lack of adequate gear to survive another night, two saves were credited to the Sitka CAP.

Dear Abbot,

Who are you, and what do you think you're doing, trying to get into our paper?

Concerned, Editor

Dear Editor,

Listen, sonny. I'm older than you but still tough, so don't get smart!

The Abbot

Dear Abbot,

Hey, you need me: I don't need you! So, lay some good answers on me fast or out you go, scratchy quill and all! Just because you look religious doesn't mean you belong in our paper. If you're peddling sermons, go see the chaplain. If you're looking for someone to make you look good, go see a plastic surgeon. If you're trying to convert me, I'm a hardtop. What's your pitch, little man?

Wasting time, Editor

Dear Wasting,

Aright, aright! You may be a good editor, kid, but you sure need a course in public relations! The chaplains told me to write you. You've got readers with questions. I've got answers. It's as simple as that. Just between us male chauvinist pigs, I'm fed up with women columnists. Abigail VanBuren and Ann Landers...who needs 'em? I say you can't trust a woman, especially with important things. Keep 'em on the society pages where they belong. When it comes to questions about religion or morality or clergymen, you need me. The chaplains are willing to let me speak up. How about you?

Try the Abbot habit. By the way, the column is free — and worth every cent.

The Abbot

Dear Reader,

Got a question that a cranky monk in a dusty CAP blue habit can answer? Send them to "Dear Abbot" in care of HQ CAP-USAF/O1, Maxwell, AFB, AL. 36112. But don't blame me for the answer you get!

Reluctantly, Editor

10-Day Rescue School

Cadets Join Canadians In Training

SOUTIA, N.Y. — Sixty Civil Air Patrol cadets were joined by 14 Canadian Army and Air cadets during New York's Thunderbird Land Rescue Training School at Harpursville, N.Y.

The 10-day school was organized by CAP Lt. Col. Howard K. Vedder New York Wing LRT coordinator. Having Canadian cadets in attendance was a first for the school and officials reported that it was very educational and enlightening, both for the Canadians as well as the CAP members. Sir of the Canadians completed the basic course while the remainder completed the advanced course.

The training included woodmanship, survival, land navigation, first aid, crash site security, land search patterns and communications. Along with the CAP members, the 14 Canadians performed in various technical operations, including rappelling and the Tyrolian Creek traverses. The advanced training course also included a four-day survival hike covering more than 10 miles. The basic training course included a two-day survival hike covering more than two miles. On the survival hike, the cadets put to practical use what they had learned by building natural shelters, setting up traps and snares, navigating and using their survival skills in general.

Upon completion of the school, each Canadian cadet received a certificate of completion and indicated a desire to return to the New York Wing's LRT school next year. The CAP cadets were from both New York and New Jersey wings. Arrangements for the Canadian cadets and two escort officers were made by CAP Lt. Col. Leo Maziemou, who also served as CAP commandant, and Colonel Vedder.

Kiwanis Clubs Hear CAP Story

LEBANON, Pa. — Members of the Annville-Cleona and Lebanon Kawanis Clubs recently heard all about Civil Air Patrol from CAP Lt. Col. Martin Sorezek, commander of the Lebanon VFW Cadet Squadron 307. The presentations were followed by a question answer period and a short talk on CAP recruiting.

According to Colonel Sorezek, the CAP story was well received and the civic leaders were enlightened about the CAP organization.

Briefings Highlight NASA Visit

HAMPTON, Va. — Civil Air Patrol cadets from Virginia's Peninsula Comp. Sq. were guests recently of the NASA Visitors Center at Langley AFB, Va., where they were briefed on the Viking Project. The Viking Project is a satellite launched from earth and scheduled to land on Mars on the 4th of July 1976 as part of the Bicentennial Birthday celebration. If all goes as planned, it will then transmit information on Mars' atmosphere and soil back to earth.

The cadets also viewed several films including one on the F-15 fighter during flight test and the B-1 On the Move.
Executive Director’s Comments

Emphasis On Aerospace Education

by Brig. Gen. Carl S. Miller, USAF
Executive Director

As I have become more and more aware of the many ways in which Civil Air Patrol contributes to the nation, I am also becoming increasingly aware of the tremendous potential for service through the aerospace education mission. I am thinking particularly of what you know as the external aerospace mission — the education of the general public on air and space matters so that we have an informed electorate as aerospace issues, civilian and military, enter into the political forum.

I have been tremendously impressed with the high motivation of the thousands of volunteer members of CAP, especially in the areas of emergency services and the cadet program. To a lesser extent you have been involved in the external aerospace education mission. CAP members seem to specialize in the mission areas of their primary interest. We have search and rescue pilots; we have cadet program people — and, we have a limited number of people who specialize in aerospace education in the external area. The time and resources of all these people are limited.

However, I think the external aerospace mission is unique in that it should, to some degree, claim the attention of all CAP members. I believe all of us have an obligation to be informed on aerospace issues — as citizens and especially as CAP members who have an obligation to educate the public as stated in the Congressional Charter. Ideally, as a minimum effort, each CAP member should serve this mission in his or her daily, casual contacts with the public. Each of you should have an informed opinion on aerospace issues and should let the public, individually or collectively, know what that opinion is at every opportunity. This in itself would be a commendable effort. It will be accomplished, however, only if the individual accepts this mission as a personal obligation. This area offers no tangible rewards for the individual — only a sense of personal satisfaction.

There is another approach to this vital mission which could be emphasized and, I believe, needs to be — that is, the planned program approach to the public. This approach requires interested leadership who plan the aerospace education effort, say at the wing level, and recruit people with the time and resources to carry out the plan. It is largely our limited number of aerospace education members who have been active in this area working with the school programs and college workshops.

For a number of years a major effort has been carried on by the USAF-CAP Regional Directors of Aerospace Education (RDAEs). However, I think that with CAP wing leadership involvement and direction, and the recruiting of membership expertise, our organized aerospace education effort could have a much greater impact on the public. I urge wing leaders to become more involved, just as I urge the Region Liaison Officers, RDAEs and wing liaison personnel to work closely with these leaders in this effort.

I have been extremely impressed with the college level aerospace education workshop program. There is no way to measure the impact of these workshops, but obviously, the thousands of teachers who attend them each year are active supporters of aerospace education, and potential supporters of Civil Air Patrol and the Air Force. There are many ways that CAP and the Air Force can support these commendable efforts by the colleges. We should become acquainted with the workshop directors in an effort to search out ways in which we can assist them.

Frankly, I would like all of you to move into aerospace education with the same dedication you pursue our other two missions, emergency services and the cadet program.
National Commander’s Comments

CARING ABOUT PEOPLE

Brig. Gen. William M. Patterson, CAP National Commander

As you read this column, Civil Air Patrol and our nation will have reached two historic plateaus. Our country will be in its Bicentennial Year — and what a 200th birthday party it promises to be — and CAP will be marking its 35th year as a national, people oriented, humanitarian entity. It is most fitting that these two milestones be celebrated concurrently.

Not only is Civil Air Patrol dedicated to those principles and ideals that have formed the bedrock of this nation but we also share the same common faith in the Almighty and a steadfast belief in the goodness, compassion and the true value of man. Yes, we CARE ABOUT PEOPLE!

Our country and Civil Air Patrol have both seen hard times, known the trauma that comes with growing up and faced the challenges that befall those who choose to place human values above all else. Yet despite our “growing pains,” Civil Air Patrol has never lost sight of its objectives and purposes.

Let me quote Article VI of the Civil Air Patrol Constitution: “1. The objectives and purposes of Civil Air Patrol shall be: a. To provide an organization to encourage and aid American citizens in the contribution of their efforts, services and resources in the development of aviation and in the maintenance of aerospace supremacy. b. To encourage and develop by example the voluntary contribution of private citizens to the public welfare. c. To provide aviation and aerospace education and training, especially to its senior and cadet members. d. To encourage and foster civil aviation in local communities. e. To provide an organization of private citizens with adequate facilities to assist in meeting local and national emergencies.”

With the above refreshing our memory, it becomes even more apparent that Civil Air Patrol is an organization of people, all volunteers, that is deeply committed to people. It is that simple. People helping people.

I am reminded of the people in Civil Air Patrol every time I hear Barbra Streisand singing the beautiful words of the song “People” as only she can sing it. And I have almost convinced myself that lyricists Bob Merrill and Jules Styne had CAP in mind as they wrote the lyrics.

Yes, Civil Air Patrol is people. People like you, who really care about people. Care is the greatest and strongest motivating force in the world. It can move mountains. Your actions and your altruism prove that as day after day you carry out your responsibilities to fellow man, your community and your country.

We hear so much these days of “man’s inhumanity to man.” Well, let me assure you that the 1975 statistics will clearly show, as they have in the thirty-three preceding years, that you have literally knocked the “in” right out of the word inhumanity. As I write this, your 1975 track record reads: LIVES SAVED 51, FINDS 284. What a tribute! No inhumanity here. No need to say more.

So, as we face the New Year together, let us continue in our steadfast belief that our fellow man is inherently good, does merit your concern and is worthy of your efforts. Let us continue to demonstrate by sacrifice and selflessness our total commitment to the youth of this country, our fellow man and the ideals of our country.

Civil Air Patrol has achieved great things and has made much progress in a relatively short thirty-four years. But we must not look back, we must focus on the future and reaffirm our faith in and our commitment to the people of this land. Collectively we have literally travelled millions of miles, yet like space voyagers, we face several light years of progress travel ahead. Let us launch ourselves into our thirty-fifth year with the conviction and zeal that have brought us to this milestone.

For your efforts in ’75, I salute you. For your endeavors in ’76, I support and encourage you and wish you a Happy New Year.

All-Cadet Exercise
Practice SAR Mission Successful

STERLING HEIGHTS, Mich. — More than 70 Civil Air Patrol cadets from the Van Dyke, Macomb and Selfridge Squadrons participated in a simulated search and rescue mission recently.

The cadets camped out overnight and centered their search activities at the Romeo Airport.

Under the direction of senior CAP personnel, the cadets briefed pilots and crews, giving all known information on the pretended lost aircraft. Planes were then dispatched to the appropriate areas where the cadets, acting as observers, searched for any possible sightings of missing aircraft.

On the ground, communicators manned the radio, keeping aircraft and mission control in contact. Cadets went out by vehicle and on foot to confirm and deny sightings made by the observers.

With the above refreshing our memory, it becomes even more apparent that Civil Air Patrol is an organization of people, all volunteers, that is deeply committed to people. It is that simple. People helping people.

So, as we face the New Year together, let us continue in our steadfast belief that our fellow man is inherently good, does merit your concern and is worthy of your efforts. Let us continue to demonstrate by sacrifice and selflessness our total commitment to the youth of this country, our fellow man and the ideals of our country.

Collectively we have literally travelled millions of miles, yet like space voyagers, we face several light years of progress travel ahead. Let us launch ourselves into our thirty-fifth year with the conviction and zeal that have brought us to this milestone.

For your efforts in ’75, I salute you. For your endeavors in ’76, I support and encourage you and wish you a Happy New Year.

VFW Supports CAP

MAXWELL AFB, Ala. — The 76th National Convention of the Veterans of Foreign Wars has adopted a resolution which calls for close support with Civil Air Patrol.

In a letter to National Headquarters, Edward L. Burnham, director of Youth Activities for VFW said, “the resolution is in recognition of the cooperation of Civil Air Patrol along with other organizations and associations in the development of our youth, safety and patriotic programs and in sincere appreciation of same.”

He added that “pursuant to this resolution, we are urging our Posts, County Councils, Districts and Departments to maintain and strengthen their ties with Civil Air Patrol.”

Western Staff College
Sets Dates For ’76 School

MAXWELL AFB, Ala. — The Western National Staff College (formerly called Pacific Region Staff College) will be held on July 11-17, 1976, on the campus of the University of Portland at Portland, Ore., it was announced recently.

Officials also stated that it is possible to have your family on campus with you during the course.

Applications should be made by a member holding the grade of warrant officer or above.

Three quarter-hours of college credit are available for those completing the college. More details, including costs, will be in the next issue of the Civil Air Patrol News.

150 Cadets Attend
Ill. ‘Camp’ Held At Chanute

CHICAGO, I11. — One hundred and fifty Illinois Wing cadets along with 14 senior members took part in the annual Illinois Wing Cadet summer encampment held at Chanute AFB, 111.

The one-week program was highlighted by Command Staff briefings on some of the major U.S. Air Force commands; Tactical Air Command (TAC), Military Airlift Command (MAC), Air Training Command (ATC), and a special briefing on the Air Force B-1 bomber.

The encampment was commanded by CAP Lt. Col. William A. Recktenwald, a former cadet, with a senior member supportive staff of 13, twelve of whom were former cadets.

Credited with the most flight time at the encampment was cadet Col. Bret Harvell, cadet encampment commander, who was in charge of a formal base evacuation ceremony. After the retreat, Air Force Maj. Gen. Frank Elliot, center commander, commented on the excellence of the CAP members handling of the ceremony.

Chanute AFB is the largest technical training center in the United States Air Force.

Unit Assists FAA During ‘Indy 500’

INDIANAPOLIS, Ind. — The Federal Aviation Administration (FAA) at the Indianapolis Weir Cook Airport recently received a helping hand from CAP when unusually heavy air traffic created by the Indianapolis 500 mile auto race, invaded Indianapolis, Ind.

Cadets from the Weir Cook Cadet Sq. listed all identification numbers of incoming aircraft and passed out taxi instructions to all aircraft to be used when departing.

The assistance proved to be of great value to the FAA and it is planned to be an annual event for the cadets of the unit.

U.S. Air Force. While attending the encampment, cadets received a complete tour and briefing on the various facets of Air Force training that is completed at Chanute.

Cadets also took part in a daily inspection program under the supervision of the cadet commander, Lt. Col. Paul Johnson, deputy cadet commander and Lt. Col. Carlos Contreras, adjutant. The unit with the best results was named the outstanding unit. Sports included baseball, volleyball and relay races.

A formal graduation ceremony was attended by more than 300 parents and friends.

NPA Honors Mississippian For ‘Skill And Flying Ability’

WASHINGTON, D.C. — President Michael Loening of the National Pilots Association (NPA) has presented the NPA’s highest award the ‘Merit Pilot Citation,’ to Civil Air Patrol Senior Member William R. Tubbs.

The award is granted to its members by the nation’s largest non-profit pilot organization in recognition of skill and flying ability as measured by 20 different tests and ratings.

Tubbs, whose pilot career began in 1973, accumulated a total of 100 qualification points, all of which were certified by an appropriate government official or flight instructor to qualify for the coveted NPA certificate.

He serves in Civil Air Patrol as commander of Mississippi Wing’s Misslou Comp. Sq.

WILLIAM R. TUBBS

RANGER TRAINING—CAP Capt. Roy Solomon, center, an expert Ranger, demonstrates a knot-tying technique to Cadet Lt. Col. Na’ehid Idriss, left, and Cadet MSgt. Tony Davis, during the recent Illinois Wing Ranger training weekend. Eighty-five cadets took part in the training which was held at Yorkville, Ill. In addition to Captain Solomon, Air Force Capt. Richard Castile, Cadet Col. Mark Sweeley of the Pennsylvania Wing and Ranger Brian Wheeler of the Illinois Wing assisted in the third in a series of Ranger training activities held by the Illinois Wing.

William R. Tubbs

150 Cadets Attend
Ill. ‘Camp’ Held At Chanute

NPA Honors Mississippian For ‘Skill And Flying Ability’

WASHINGTON, D.C. — President Michael Loening of the National Pilots Association (NPA) has presented the NPA’s highest award the ‘Merit Pilot Citation,’ to Civil Air Patrol Senior Member William R. Tubbs.

The award is granted to its members by the nation’s largest non-profit pilot organization in recognition of skill and flying ability as measured by 20 different tests and ratings.

Tubbs, whose pilot career began in 1973, accumulated a total of 100 qualification points, all of which were certified by an appropriate government official or flight instructor to qualify for the coveted NPA certificate.

He serves in Civil Air Patrol as commander of Mississippi Wing’s Misslou Comp. Sq.

WILLIAM R. TUBBS

RANGER TRAINING—CAP Capt. Roy Solomon, center, an expert Ranger, demonstrates a knot-tying technique to Cadet Lt. Col. Na’ehid Idriss, left, and Cadet MSgt. Tony Davis, during the recent Illinois Wing Ranger training weekend. Eighty-five cadets took part in the training which was held at Yorkville, Ill. In addition to Captain Solomon, Air Force Capt. Richard Castile, Cadet Col. Mark Sweeley of the Pennsylvania Wing and Ranger Brian Wheeler of the Illinois Wing assisted in the third in a series of Ranger training activities held by the Illinois Wing.
'Biggest Little City'

Mississippi City Honors CAP—CD Units

COLUMBIA, Miss. — As you enter the town of Columbia, Miss., a large roadside sign reads, "Mississippi's Biggest Little City." The town has earned this reputation through the years by doing things in a big way, and the people who live there are proud of it.

So when the 27,000 people of the small town honored the members of the state's Civil Air Patrol and Civil Defense units recently, it was no surprise that it was done in a big way.

The mayor got things started by signing a proclamation declaring November 11, 1975, as Civil Air Patrol and Civil Defense Day in the city. All public schools were closed for a half-day to allow the school bands to participate in the parade and to give the children a chance to watch.

The parade committee seemed to have control over the weather as the day dawned overcast and cloudy, but the sun suddenly broke through and brought one of the warmest days ever recorded in November in the state.

Participating in the parade were more than 90 units including the three local high school marching bands along with some of the modern emergency and rescue vehicles used by CAP and Civil Defense units in counties around the state.

The parade stretched out more than a mile and, as the man most responsible for its success, James Thornhill, director, Columbia-Marion County Civil Defense Council and deputy commander of the Columbia CAP Comp. Sq., said, "I think we can safely say it is one of the largest parades ever held in the state."

Once the parade had wound through the downtown streets, it concluded at the City Park where an outdoor cookout was held. Speeches by local and visiting dignitaries highlighted the activities in the park.

Among those giving speeches were: Harold Crain, director of the Mississippi Civil Defense Council; John Wooten, mayor pro tem; Maj. Gen. E.A. Turnage, Adjutant General of Mississippi; CAP Maj. T.S. Robertson Jr., of the Mississippi CAP Wing staff; and a representative of the Veterans of Foreign Wars.

As the day's activities drew to a close, Thornhill remarked, "It was a major undertaking, but there is no doubt that it was a success. The people have already started talking to me about having a Thanksgiving parade, but I told them I was thinking about taking a vacation to get some rest."

Thornhill concluded by saying, "I want to add that the parade is just the beginning of many such events to promote the importance of Civil Air Patrol and Civil Defense. We need to wake the country to the fact that civil preparedness in any nation is essential in a life or death situation. And our CAP and Civil Defense units work hand in hand."
1976 Senior Member Activities

**ACTIVITIES**

1. **CAP National Staff College:** The objective is to develop more effective CAP commanders and staff members by offering a program based upon experiences in all aspects of the CAP program. The curriculum includes lectures, seminars, and nationally recognized guest speakers, covering such topics as communicative skills, leadership and management, staff organization, and CAP problem solving.

2. **National Search and Rescue (SAR) School:** A one-week course designed to enhance the professionalism of CAP mission coordinators. The curriculum includes all aspects of organization, planning, communications, and operations involving inland search and rescue.

3. **ARRS CAP Mission Coordinator Course:** A two-day ARRS-conducted course designed for CAP mission coordinators and other CAP SAR personnel. Covers all facets of inland search and rescue.

4. **Field Clinics:** CAP regions and/or wings have considerable latitude in development of flight clinics. They may be CAP generated or externally generated. Nationally approved clinics that meet the goals of military and civilian executives who are, or will be, engaged in managing key national security programs.

5. **Pacific Region Staff College:** (see above description for National Staff College).

6. **Extension Course Institute (ECI):** ECI is the correspondence school of the USAF. Its services are available without cost to CAP members. Two broad areas of study are available: General Military Education and Specialized Courses. Military courses are provided to improve the knowledge of command and leadership. ECI specialized courses are designed to provide training for CAP members in the performance of specialized duty (e.g., communications, aircraft maintenance, etc.).

7. **Industrial College of the Armed Forces (ICAF) Correspondence School:** This school directs its educational effort toward support of the national interest through enhancing the knowledge of military and civilian executives who are, or will be, engaged in managing key national security programs.

8. **National Security Seminars:** These seminars are sponsored by the Industrial College of the Armed Forces to foster, among Reserve Officers and interested citizens, a better understanding of the many interrelated and complex national and international problems associated with national security.

9. **Weapons Employment Course for Allied Officers:** This course covers comprehensive familiarization with basic space language and principles, fundamentals of aeronautics, technology, and concepts which will affect future operational space capability.

10. **International Air Cadet Exchange Escort:** Annually, CAP sponsors a one-month program to foster international understanding, goodwill, and fellowship. CAP exchanges cadets with similar organizations representing some 22 foreign nations. Selected senior members act as escort officers for the cadets during the exchange program.

11. **Defense Civil Preparedness Agency Staff College:** Three home study courses are available which pertain to civil defense-disaster preparedness. (1) CIVIL DEFENSE, U.S.A. (2) THE CIVIL DEFENSE DIRECTOR-COORDINATOR. (3) INTRODUCTION TO RADIOLOGICAL MONITORING.

12. **Northeast Region Communications School:** The purpose of the school program is to train CAP personnel to become competent communicators, efficient in emergency mission procedures and to become confident and able communications officers familiar with the rules, laws, and philosophy of communications administration.

**WHO**

1. **CAP officers and warrant officers only.**

2. **Selected CAP mission coordinators and potential mission coordinators actively involved in inland SAR activities.**

3. **The CAP Region Headquarters determines eligibility.**

4. **The CAP Region and/or Wing Headquarters determines who is eligible for these activities. (CAP also eligible for Federal Aviation Administration and Aircraft Owners and Pilots Association clinics.)**

5. **Eligible senior member officers.**

6. **Eligible CAP senior members (See CAPR 50-1).**

7. **Senior CAP members serving at the executive level, majors and above. Completion of a baccalaureate degree and completion of A Command and Staff College Correspondence Course desired.**

8. **Attendance at these seminars open to all CAP senior members.**

9. **CAP captains through colonels.**

10. **Criteria to be announced by HQ CAP-USAF/ED.**

11. **All CAP members may apply for the “Civil Defense USA” and “Introduction to Radiological Monitoring” courses. Only qualified mission coordinators and prospective mission coordinators in training may apply for “The Civil Defense Director/Coordinator” Course.**

12. **Cadet or senior members.**

Program Features Rescue Squad

PITTSBURGH, Pa. — A local Pittsburgh television station, KDKA, recently featured Civil Air Patrol’s Steel Valley Radio Disaster Squadron 613 on their “On Air” program. The show, hosted by Frank Conti, discussed rescue and survival procedures with Chuck Rittenbaugh, Scotty Milford, Bill Miller and Charles Kellerman, all members of the Pennsylvania unit.

Members of the Rescue Squad are new to the Civil Air Patrol. Previously known as the Steel Valley Climbers, the squad joined CAP in full force to form the squadron.

Known nationwide for their rescue techniques, members of the squad are capable of making all types of drops and climbs, mine rescues, building evacuations, flood evacuations and civil defense functions.

The unit is also involved in police and fireman training.

Unit Sponsors FAA Seminar

PUEBLO, Colo. — A free ride in a vertigo chair and a chance to win a $40,000 airplane attracted over 100 Pueblo area pilots and others interested in aviation safety to a Federal Aviation Administration seminar sponsored by Colorado’s Thunderbird Senior Sq.

The vertigo chair was part of a presentation by Gary Koch, FAA General Aviation District Office safety specialist. Also on the program were FAA films on vertigo, and a talk by Thunderbird Squadron member Paul Eubanks on local traffic pattern problems. Eubanks is a controller at the Pueblo combined station-tower.

The possibility of winning an airplane was provided by the General Aviation Manufacturers Association as part of a nationwide Safe Pilots Sweeps II contest.

Weather Class Highlights Training

PORTSMOUTH, R.I. — Civil Air Patrol’s Rhode Island Wing held its annual training encampment at Camp Narragansett, R.I. Ninety-seven cadets and 18 senior members from throughout the state participated in the exercise.

Highlights of the training included a class on weather by a local television weather forecaster and a demonstration of helicopter rescue by the Army National Guard.

The Newport-Bristol Squadron commander, Capt. Frederick Frongillo, was the encampment commander.

WELCOME — CAP Maj. Edward Geyer, right, commander of New York Wing’s Nassau Squadron 5, greets Capt. Fred Hopkins, son of the 735th Dundas-Canterbury Squadron, Royal Canadian Army and Air Cadets upon his arrival in Farmingdale, N.Y. Thirty-two Royal Canadian Army and Air Cadets visited Long Island and New York City during a vacation and were hosted by CAP members of the Long Island Group.

Flying Bivouac Provides Experience For Cadets

DAYTONA BEACH, Fla. — Cadets from the Daytona Beach Comp. Sq. went on a recent flying bivouac designed to provide flight experience for cadets new to the unit.

The camp site was in a grove of moss-hung live oaks at New Smyrna Beach Municipal Airport, far enough away from the highway to muffle the traffic noise and close enough to the airport’s runways and taxiways to minimize walking distance and aircraft ground time.

Twelve Civil Air Patrol senior members were on hand to provide the flying, using three CAP-owned and three member-owned aircraft. All cadets on the bivouac had at least two flights, and most had three during the 24 hours of flying time logged by the six aircraft.

Although the major purpose of the bivouac was flying, other activities were carried on to further the cadets’ training in the mission of CAP. Each participant attended first aid training and classes in setting up and dismantling a camp area.

Sunday morning religious services were conducted for CAP members and their families and friends. That was scheduled to be the final event of the weekend, but enthusiasm was so high that flight activity continued for a couple of hours, with six prospective new cadets going off the ground for the first time.
ALL ABOUT CAP—A prospective member is briefed on Civil Air Patrol by, left to right, Air Force Reserve Assistance Officers Lt. Col. William R. Nieman, Maj. Walter King, Lt. Col. William F. Seery and CAP 2d Lt. Rosalie M. Gwynn of the Manchester Composite Squadron. The Connecticut Wing sponsored this recruiting booth recently at the Goodspeed Airport Air Show held in East Haddam, Conn.

Busy Commander Repeats Vows At Outdoor Wedding Ceremony

CROSBYTON, Tex. — Capt. Floyd Richardson has been a busy man this fall, so busy that he almost didn’t find time to get married. In fact, he and his bride settled for an outdoor ceremony before a county judge, as witnesses, the two had a crowd of several hundred which had gathered for an entirely different occasion. They simply took time out during a lull in the festivities for the wedding.

Capt. Richardson, commander of the brand-new Crosbyton Composite Sq., and himself a CAP member for only about a year, has been busy trying to get the squadron organized and under way as a going concern. Almost single-handedly, he rounded up the 30 members of the new unit.

Bivouac Held To Supplement SAR Training

ORLANDO, Fla. — The Orlando Cadet Sq. recently spent a weekend at the Sebastian National Park training their newly formed cadet emergency services team.

The bivouac was designed to supplement training each member already received at earlier SAR practices and to mold the team into a coordinated, smooth running unit.

The cadets and two seniors on the team practiced using lenticular compass, the negotiated through the Florida brush to prove their skill. An exercise in communications provided an opportunity to correct improper radio procedures and to promote speed and efficiency in communication.

The ground team also practiced ground search techniques, and emergency rescue and short distance transfer techniques.

Cadets Are ‘Certified’ During Training Camp

PENDLETON, Ore. — “Certified” was the magic word that led 26 Pendleton Comp. Sq. cadets to the Kiwanis Cabin for seven days recently. And “certified” is the word today for seven cadets and 10 more needing only to complete first aid requirements to receive the shoulder patch added to their fatigue uniforms.

“Certified” signifies that a person has completed both written and skill tests of minimum standards set up by the Oregon State Sheriff’s Association and the Oregon Department of Emergency Services. Once certified, they may be utilized anywhere in Oregon on ground search for missing persons.

COMPASS READING—Cadets Marshall Montgomery and Ed Young of Oregon’s Pendleton Composite Squadron get a compass bearing during their survival test to be “certified” in emergency services work.

Optimist View CAP Display

HAMILTON AFB, Calif.—The Marin Unit, California’s “Outstanding Composite Squadron of the Year,” staffed the display for the four-day duration of the convention.

Project officer was 2d Lt. Helene F. Stratman. She was assisted by Cadets Steven Amato, James Wallis, Rod Henry, Ted Cleveland and 2d Lt. Julie Zamwali and WO Wayne Behera.
People In the News

A former cadet of the Tri-Cities Comp. Sq. (Washington Wing) Doyle Holloway, has joined the U.S. Army National Guard. Three cadets from the New Jersey Wing of Civil Air Patrol recently completed last school year as members of the honor society. They are 2d Lt. Janice Reaves, Cadet Basic Sgt. Richard Barkhurst... Cadet Melanie Bronham of the Salina Comp. Sq. (Kansas Wing) has completed observers school at Kemper Military College. Boonsville, Mo.

Cadet Julie Wright of Maryland Wing's Eastern Command School and Maryland Wing's Outstanding Female Cadet during this year's Wing summer encampment. Twenty-three cadets of the Van Dyke Cadet Sq. 3-7 recently completed the standard first aid and personal safety course... Members of Washington Wing's Walla Walla Comp. Sq., and Tri-Cities Comp. Sq., performed crowd control at the Red Carpet Flying Service Air Show held recently at Walla Walla, Wash... Two members of the National Capital Wing, CAP Col. Charles X. Saracec and Capt. Arluye Perry, were honored recently by a local television station. The two were named as Volunteers of the Month by station WMAL.

Cadet Lt. Col. Todd Clifton has been named Arizona Wing's Cadet of the Year for outstanding achievement in 1974 and was the wing's entry for National Cadet of the Year... Cadet 2d Lt. Janice Reaves of Washington Wing's Tri-Cities Comp. Sq., has earned his private pilot license... Members of Marin Air Rescue Sq. (Washington Wing) recently manned a CAP booth at a local shopping center at Terra Linda, Calif. The members, including 2d Lt. Helen Hall, Capt. Jim Weiler, Steve Mmato and Bob Paix, exhibited an aerospace board, unit trophies and handed out CAP information...

Eleven cadets of the St. Louis Comp. Sq. One (Missouri Wing) assisted in answering telephones and collecting money during the Jerry Lewis Muscular Dystrophy Telethon at St. Louis, Mo. The group included Cadets Bill Diamond, Laurie Hevisis, Judy Milligan, Lowell Summers, Rob Hardin, Bob Mann, Denise Ockko, Kevin Seurs, Dennis Stockwell, Randy Venable and Maureen Stockwell... The squadron commander of the Torrington Cadet Sq. (Connecticut Wing), CWO Ronald S. Richards, Jr., has exchanged his CAP uniform for that of the U.S. Air Force. He plans a career in Avionics Communications... CAP 1st Lt. Ethel Gier of the Delaware Wing recently earned her private pilot license...

CAP Maj. Robert F. Hahn, commander of New Jersey Wing, Sr. Sq., recently presented CAP certificates of appreciation to John Lauzier, John Gable, Bertram Schwartz and Albert Hillian. The certificates were presented in appreciation for their support to Civil Air Patrol... Four cadets of the Tulsa Wing of Oklahoma Wing recently spent a week at Ft. Campbell, Ky., as guests of the U.S. Army's 101st Airborne Division. While there, their activities included competition on the rifle range, rappelling and observing all phases of airborne training. Making the visit were Cadets WO Andy Pulliam, 1st Lt. Kevin Greer, cadet David Ray and WO John Pulliam...

Second Lt. David Lashmore of Tennessee Wing's Marshall Co. Comp. Sq., has earned his master's degree in administration from Middle Tennessee University in only 11 months... A five year veteran of CAP, Cadet Capt. Karla Hessler of the Tri-Cities Comp. Sq. (Washington Wing) recently conducted an interview as chairman of the Washington Wing Cadet Advisory Council. Lt. Pat Burke of Washington Wing's Tri-Cities Comp. Sq., obtained his commercial pilot license... Two members of the Tri-Cities Comp. Sq. (Washington Wing) earned their wings recently. Second Lt. Juan Lanza earned his pilot wings and 1st Lt. William Campbell earned his wings...

CAP Lt. Col. Theodore T. LaPlante of the Secectandy Co. Sq. (New York Wing) has to young men of various organizations who have demonstrated exemplary qualities of cooperative effort, self control, perseverance, good school work and community service. They are 2d Lt. Janice Reaves, Cadet Basic Sgt. Richard Barkhurst... Cadet Melanie Bronham of the Salina Comp. Sq. (Kansas Wing) has completed observers school at Kemper Military College. Boonsville, Mo.

Search Has Unique Ending

ALBUQUERQUE, N.M. -- Members of Albuquerque Comp. Sq. One, New Mexico Wing, recently completed an unusual search effort. The search was unusual because once the lost aircraft was located, the Civil Air Patrol members had three options open on what to do—they could haul the wreck out, pile up the pieces or stack the pieces and paint them yellow.

The crashed aircraft was an old Navy flying boat and old crashes have a habit of being spotted in other air searches, wasting valuable time. If left stacked and painted yellow it can be used by search teams for practice.

Ga. Unit Displays Wares

SAVANNAH, Ga. -- The Savannah Comp. Sq. recently displayed various equipment used by the Civil Air Patrol at a local Armed Forces Appreciation Night hosted by the 168th Air National Guard at Savannah.

Highlighting the CAP unit's display was a mobile communication van and static model rocket display. During ceremonies at the Appreciation Night, Cadet Capt. Gary Cox received his Earhart Award from Maj. Gen. B.L. Davis, USAF Recruiting Service commander.
TULLAHOMA, Tenn. — Members of the Tullahoma Civil Air Patrol Cadet Squadron recently played a major role in a Bicentennial Pageant held at the Old Stone Fort Park in Manchester, Tenn.

The pageant depicted various times in the country's history, but it basically portrayed the part Old Stone Fort, and the surrounding area, played during the Civil War.

There were more than 100 amateur actors and actresses taking part in celebration. Also participating were two prominent political figures from the local area, State Senator Ernest Crouch of McMinnville, Tenn., and State Representative J. Stanley Rogers of Manchester, Tenn.

Throughout the pageant, six different American flags, from the original 13-star flag to the present 50-star flag, were presented and displayed by seven members of the Tullahoma Cadet Sq. The participating cadets were: First Lt. Kevin Greer, CWO Andy Pulliam, Sgt. Storey Sorensen, AIC Craig Smith, AIC Tommy Sipe, Sgt. Bill Sipe and Ann. Debra Ambrose.

Nearly 1,000 persons viewed the presentation from a grassy slope that formed a natural amphitheater.

Another highlight of the presentation was the appearance of the reactivated First Kentucky Orphan's Brigade. They wore authentic Civil War uniforms and displayed their light field artillery pieces.

FLAG DISPLAY — Nearly 1,000 spectators were on hand to watch Tullahoma Civil Air Patrol Cadet Squadron members display American flags during a Bicentennial Pageant at the Old Stone Fort in Manchester, Tenn.

Dedication Is Key

SAR Exercise Tests Wings Ability

MANASSAS, Va. — Dedication was the keynote during the National Capital Wing's annual search and rescue exercise held here recently.

Coordinator for the exercise, which tested the wings ability to estimate, upgrade, and evaluate their emergency services capability, was CAP Maj. Fred Hess, commander of the Fairfax Comp. Sq.

Commenting on his difficult task, the CAP major stated that he accepted the position because of "my deep concern for people who fly."

Facilities for the wing were at a minimum this year. A trailer and tents were used as mission headquarters with classes being taught in the field and in tents. The wing had only one aircraft available. However, the dedicated members rented four aircraft out of their own funds to make the exercise more realistic.

All search activities were accomplished under the direction of CAP Lt. Col. Robert Paolucci, who served as operations officer for the mission.

Braving cold, rain, lack of facilities and even lack of aircraft, the members of the National Capital Wing not only showed they can support search and rescue activities, but also that they want to be very much a part of the CAP search and rescue mission.

Delaware Unit Devises System To Select Cadets On Merit

SMYRNA, Del. — The Smyrna Cadet Sq. has devised a system of awards which enables cadets to be selected to attend the National Board meeting each year on the basis of merit.

The system brings out the best in physical fitness, scholastic ability and personal achievement of all cadets.

Cadet Sgts. Mary E. Stone and David A. Turek were winners last year and attended the meeting in St. Louis, Mo.

Cadet Stone has been very active since joining CAP. She was selected "Cadet of the Day" and served in the color guard at the graduation day of the Delaware Wing encampment. She has also participated in several search and rescue exercises and Civil Defense training.

Cadet Turek has been very active in the squadron since entering CAP, and attended many of the training exercises.
Communications Control Center, Defense, issued in cooperation with Headquarters to request September causing the Carroll effort. Civil Air Patrol personnel put in more than 2,500 man-hours at Headquarters.

All radio traffic between the sheriff's department were to be dispatched to the Carroll Squadron's command center, and Robert E. Riggs, right, a member of Alaska's Baronof Senior Squadron. Presenting the award is Lyle K. Brown, FAA Region director. The two risked their lives to rescue Patty A. Salamanchuk, also a CAP member with the Baronof unit, when the aircraft she was in crashed in a body of water adjacent to the airport.

**FOR HEROISM—Two Alaska pilots were honored recently for heroism which they displayed earlier this year when a plane crashed on takeoff from the Sitka, Alaska, airport. Receiving the awards—one of FAA's highest awards for heroic acts—are Dutch Vent, center, and Robert E. Riggs, right, a member of Alaska's Baronof Senior Squadron. Presenting the award is Lyle K. Brown, FAA Region director. The two risked their lives to rescue Patty A. Salamanchuk, also a CAP member with the Baronof unit, when the aircraft she was in crashed in a body of water adjacent to the airport.**

**Praise Received**

**Squadron Assists In Disaster**

WESTMINSTER, Md. Heavy rains, caused by the remnants of Hurricane Eloise, produced severe flooding in Carroll County, Md., in September causing the Carroll County Civil Defense Headquarters to request assistance from the Carroll Comp. Sq. in Westminster.

The initial request, issued through the County Communications Control Center, was for the Carroll Squadron's mobile communications center to be dispatched to the community of Detour, near the Monocacy River. Local volunteer fire companies and the county sheriff's department were already actively evacuating the residents and their belongings, and the Civil Defense wanted a command post of their own so they could direct all radio traffic between the disaster scene and Civil Defense Headquarters.

Over the next three days, 103 members of the Maryland Wing put in more than 2,500 man-hours in support of the disaster relief effort. Civil Air Patrol personnel conducted such activities as perimeter security of the town, manned roadblocks at the request of the sheriff's department, helped evacuate personal belongings, stood fire guard over gasoline storage drums, provided emergency power and lighting, assisted with first aid stations, provided fresh water in a CAP 300-gallon water trailer, and helped clean up the town and return the residents after the flood waters had crested at 26 feet above flood stage.

Damage assessment surveys were conducted by CAP ground teams in six communities at the request of the CAP mission director, Capt. Donald R. Jordan, of Maryland Wing Headquarters. The information gathered from the ground teams proved valuable to the Civil Defense Headquarters.

**New Radio Repeater Aids Communications**

WINSTON-SALEM, N.C.—The Winston-Salem Comp. Sq., has commissioned a VHF-FM radio repeater atop Sauertown Mountain north of here which will improve Civil Air Patrol communications, especially in the Piedmont, N.C., area.

This repeater re-transmits radio signals picked up on one frequency thus allowing mobile and relatively low-powered stations to communicate with each other over a much increased distance.

A former cadet and now senior member WO Charles M. Link was the force behind this repeater project. He conceived the need and selected the location for the antenna. Link also performed the engineering, much of the construction of electronic components and adjusted and tuned the equipment until it became operational.

During the entire project, Link was assisted by many of the Winston-Salem Squadron members along with a number of non-CAP personnel.

This communications capability improves CAP's ability to react in any kind of emergency situation in the area. The repeater covers an area from Durham, N.C., to west of Statesville to Charlotte.

**37 CAP Cadets Attend Encampment In Florida**

PATRICK AFB, Fla.—Thirty-seven young CAP cadets from Brevard County (Florida) Wing gathered at Patrick AFB, to attend a special encampment held at the Patrick picnic grounds.

A flood related chemical spill was located by a ground team from the Middle River Comp. Sq. and the Maryland Department of Natural Resources was contacted and they cleaned it up before it contaminated a Baltimore city water supply.

One of the Carroll County commanders, along with the director of the Carroll County Communications Control Center, was taken on an aerial damage assessment survey of the entire county in a CAP corporate aircraft from the Frederick Comp. Sq.

Civil Air Patrol units participating in the disaster effort received a letter stating, "The County Commissioners wish to commend your members for the manner in which the Civil Air Patrol aided in the emergency caused by Storm Eloise. All reports which have been forwarded to this office, as well as our individual observations, have indicated high praise for services rendered during this crisis."

The Carroll Comp. Sq. was assisted during the disaster period by personnel from the Frederick, Reisterstown, Westminster, Apollo I, Middle River, Gunpowder, Bowie-Belair, and Bethesda-Cherry Chase Squadrons.

**IMPROVED COMMUNICATIONS—Cadet Capt. Wesley Googe of the Winston-Salem Comp. Sq. guides one of the antenna arrays into position on the fire tower at Sauertown Mountain near Winston-Salem, N.C. The antenna will receive and transmit signals from the CAP VHF-FM repeater which covers Piedmont, N.C. (Photo by CAP Lt. Col. Holli Nelson)**

**AIRCRAFT FAMILIARIZATION—CAP Capt. Jack Grimes, encampment commander, discusses characteristics of the T-34 aircraft with cadets, left to right, John Bering, Jim Choss, Dino Canales, Albert Weir, Glen Freeman and Cheryl Bricker during an encampment held at Patrick AFB, Fla. (Photo by SSgt. Tib Warganich)**

**BI-DEA Exchange**

The Illinois Bicentennial Commission has published Bicentennial ideas for everyone. In a series of handy and attractive brochures, the Illinois Bicentennial folks have given Bicentennial hints to youth, libraries, religious organizations and senior citizens.

All of the suggestions are realistic, exciting and relevant for Bicentennial celebrations and communications all around the country.

**Contact:** Illinois Bicentennial Commission, 410 N. Michigan, Room 1044, Chicago, IL 60611.
**Virginia Members Show Relitives How Squadran Used Contributions**

by CAP Capt. Carol M. Benettor

**LYNCHBURG, VA.** — Three members of the Lynchburg Civil Air Patrol ComP, Sq. Bnew from New London Airport to Illinois in October to show relatives and friends of a 1973 plane crash that showed how much a crash and equipment contribution to the squadron was used.

Richard Buckert, of Monticell, 11, and two passengers died in a March 1973 plane crash in a mountainous area near Monticello, Va. Capt. Ted Estep, one of those making the trip, flew the sortie that first sighted the wreckage during the rescue mission.

In July 1973, Buckert's relatives and friends in the Monmouth area presented the Lynchburg Squadron with a $1,922 check, with an aircraft engine and some welding equipment Buckert had been used to build a plane before his death.

Lynchburg Squadron used the donation to obtain and fix up a U.S. Army surplus "Bird Dog" spotter plane. This plane, along with another "Bird Dog" assigned to the squadron, left New London Airport and spent the weekend in Monmouth.

Making the trip, in addition to Captain Estep, were Maj. Tibbs, commander Task Force Three; Capt. Dave Hardin, squadron member, and Air Force Maj. Edward Fowler, Virginia Wing liaison officer.

Explaining the purpose of the trip was to show each other how contributions were used, and they were shocked to learn that four Virginians actually would fly to Illinois to show the contributors the plane.
Daytona Cadets Tour Jacksonville Center

DAYTONA BEACH, Fla. — Members of Civil Air Patrol’s Daytona Beach Comp. Sq., were recently given a comprehensive tour of the Jacksonville Air Traffic Control Center.

After assembling in the lecture room of the training facility, the 31 members were briefed by air traffic control specialists and shown a film on air traffic control procedures. The cadets and seniors were then introduced to the system and told of training requirements and possible employment opportunities.

Following a question and answer period, the squadron was split into three groups to tour the installation. Both manual and computerized control techniques were demonstrated.

The groups were small enough so they could stand behind a working controller and watch traffic moving across the radar scopes.

After a session in the training room where techniques of training in manual control were demonstrated and questions answered, the group reassembled for debriefing before departure.

Training At National SAR School

Put To Excellent Use In Hurry

TULSA, Okla. — Training received at the National Search and Rescue School at Governor’s Island, N.Y., was put to good use in a hurry by Capt. Steward Giesick, commander of the 76th Rescue and Recovery Sq.

Captain Giesick had just returned from attending the school when a RedCAP mission activated his Tulsa unit. With Captain Giesick acting as mission commander, only three hours were needed to find the missing aircraft.

The aircraft had been missing from Riverside Airport at Tulsa where it had departed the day before on a routine flight. Observers in a plane piloted by CAP 1st Lt. Tom Davies of the Tulsa unit were the first to spot the downed aircraft. Cadets of the Tulsa unit participated in ground team activities when the unit’s four-wheeled drive ambulance was the only vehicle that could reach the crash site in the rough terrain.

The two occupants of the downed aircraft were killed in the crash.

War Eagle Unit Visits Eglin AFB

AUBURN, Ala. — Seven cadets from Alabama’s War Eagle Comp. Sq. recently travelled to Eglin AFB, Fla., for a two-day tour. The cadets, Craig Calhoun, Woody Greathouse, John Blaclock, Lucy Lamar, Pat Noa, Pixie Biales and Nancy Conn, and their escort, CAP 2d Lt. Jane Tarver, toured the Air Force Armament Museum where they viewed a B-25 bomber used in the Gen. Jimmy Doolittle raid on Japan. In addition, they were briefed on a number of aircraft stationed at Eglin and visited the world’s largest environmental test chamber, the McKinley Climatic Laboratory.

The cadets were also honored with a visit to the Vietnamese Refugee Camp located on the huge Eglin complex.

LEARNING HOW—Edgar L. Redman, left, of the Jacksonville, Fla., Air Traffic Control Center, explains air traffic control training routines to, CAP Lt. Dennis McDonald, CAP MSG. Rich Mulford and CAP CWO Chuck Vola, of Daytona Beach Composite Squadron.

CAP: It’s Deductible!

If you’ve been poring over your financial records for 1974 getting ready to submit your Federal Income tax, it is time to consider your contributions to Civil Air Patrol.

Many members apparently are still not aware that this organization qualifies as a legitimate benevolent corporation. The Internal Revenue Service has granted CAP income tax exempt status since 1947 so that contributions to CAP can be made and deducted from personal and corporate income in computing taxable income.

These deductions include cash gifts, donations of properties, dues, unreimbursed expenses made incident to rendering service to Civil Air Patrol, unreimbursed overnight travel expenses away from home, unreimbursed transportation costs, repair and maintenance of uniforms and insignia.

Other deductible expenses are rental of aircraft for CAP functions, both usage and fuel/oil; also for use in cadet orientation rides; and registration fees at CAP functions.

But before you start knocking these gifts and expenses off schedule A of your Form 1040, make sure that you have the necessary records to support your deduction. These records can take many forms, ranging from cancelled checks and receipts to documents showing the transfer of real property to the Civil Air Patrol Corporation. All records, including those of other deductions claimed, should be retained at least five years — just in case the Internal Revenue Service (IRS) should decide to audit your account.

But what if you neglected to keep such records during 1975? Well that’s water over the dam. But it is not too early to start planning ahead for next year when you submit your 1976 tax return.

One of the easiest ways to maintain such records is to start a folder on all your CAP expenses. This can be as simple as a brown manila envelope in which you can file away your cancelled checks, receipts and documents to support your claim next year.

It is always wise to keep a running account of these expenses, including the date, what it went for, and any other memory joggers that will remind you why you spent $10 for a hotel in Minneapolis or $20 for the repair of your unit motion picture projector. Don’t overlook your official CAP orders. They are an invaluable reference as well as good supporting documents.

A gift to Civil Air Patrol falls into the same category as donations to churches, tax-exempt education organizations, exempt hospitals, or a number of other charitable organizations. Donations in this category may be deducted up to 50 percent of the taxpayer’s adjusted gross income, whereas the normal allowance is only 20 percent.

These contributions are entered on Schedule A of your Form 1040 and are allowed only in the year of actual payment, whether the taxpayer is on the cash or accrual basis and regardless of when the amount is pledged. To be deductible, the contribution must be made by the taxpayer. In other words, you can’t claim junior’s cadet uniform and expenses though you can claim mama’s if she is an active CAP member and you are filing jointly.

When a personal automobile is used on CAP activities, actual expenditures for the use can be deducted, or you may claim seven cents per mile driven plus parking fees and tolls in lieu of actual expenses. In either case, make sure you have the records to back your claim.

Some items you may not claim: value of services donated, depreciation, repair of private property damaged on CAP activity (although it may qualify as a casualty loss), proportionate cost of repair and maintenance of private property used jointly on CAP activities, personally, entertainment and hospital and medical expenses of injuries sustained in CAP activities. The latter may qualify as a medical expense deduction, however.

A recent ruling by the Commissioner of IRS concerned admissions and tickets to fundraising activities for charities. The portion of the ticket that goes toward admission is not deductible. If part of the ticket is above the admission cost and is solicited as a gift, that portion is deductible. However, the burden is on the taxpayer to prove that a portion is above the admission price.

These are just a few simple hints about the tax advantages available to you when you give your support to Civil Air Patrol. For more detailed information, be sure to consult your attorney, income tax councilor or a representative of the IRS.

You can save money and support a worthy cause by giving to Civil Air Patrol. Just remember:

1. Make sure they are valid deductions;
2. Keep supporting records and documents;
3. Consult your attorney, tax advisor or IRS representative.
17 November 1975

SUBJECT: National Commander's Aircraft Accident Policy Letter

TO: All CAP Commanders

It is abundantly clear to both General Miller and myself that Civil Air Patrol's accident record warrants drastic remedial action at all levels of command. Therefore, I propose to institute the following policies CAP-wide effective immediately.

a. Any pilot involved in an aircraft accident will be automatically grounded pending an accident investigation and a review of such proceedings by the wing and region commanders concerned.

b. If at the end of this investigation period it is determined that the accident occurred due to factors beyond the pilot's control the wing commander concerned may reinstate the pilot to full flying status subject to the region commander's concurrence.

c. If it is determined that the accident did involve pilot error the wing commander will be expected to take appropriate action immediately in accordance with CAP regulations. Such action may include any or all of the following: permanent grounding, pecuniary liability for aircraft damages up to but not to exceed five hundred dollars ($500.00), verbal or written reprimand, termination of membership in Civil Air Patrol.

It is fully recognized that these actions may be considered harsh when not viewed in the context of human suffering, loss of life and the tremendous drain on corporate resources, both human and material. The time has come to stop the compromise that many of us have obviously made in our flying safety program, what is needed now is a positive, no nonsense, firm approach that puts both meaning and teeth into our accident prevention program.

I expect commanders at all echelons to be aware of this policy, implement it impartially and immediately, thereby reducing our losses and eliminating the terrible human suffering that we have tolerated far too long.

WILLIAM M. PATTERSON
Brigadier General, CAP
National Commander
PERSONNEL

1. FAA AERONAUTICAL RATINGS. National Headquarters is in the process of updating the senior membership file to show current FAA aeronautical ratings on all CAP senior members. 1976 membership renewal cards have space for FAA ratings only (not to be confused with CAP aeronautical ratings already shown on the membership listing). Renewing members will also be requested CAP flight check. In addition to collecting this data from the membership, there will also be an initial data collection project by use of the membership listing. Details will be furnished all units by letter in early 1976.

INFORMATION

2. REPEAT ANNOUNCEMENT: NEW CAP TV FILM SPOT. Send in your request for the new 30-second TV film spot now. Helicopters were announced in the Bulletin Board section, CAP NEWS, November issue.

3. UNIT NEWSLETTERS. If your unit has a newsletter or any other kind of internal information publication, remember you must send a copy of it to HQ CAP-USAF/OIR. Each time it is published in order to get credit for it in the Commander's Evaluation. Also, be sure your publications bear a date and clearly identify your unit and your wing so the credit goes to the right place.

4. NEW CAP SENIOR MARKET TAPPED. In the near future, CAP units may be receiving inquiries about Civil Air Patrol from recently retired/retired Air Force personnel. HQ CAP-USAF/OIR has supplied all Air Force Base Personnel Offices in the United States with CAP pamphlets. A CAP pamphlet will now be included as part of the outbriefing for retirees/retirees.

5. CADET RECRUITING TEAM SCORER. A cadet recruiting team consisting of a Cadet Captain, a Flight Commander, and two Flight Sergeants went to Middlebury High School in Vermont to talk to the 7th and 8th graders. The cadet team gave the entire presentation, the slide and talk show. Our congratulations to the cadets and their recruiting efforts to help start a new CAP squadron. Major Mezzo, Vermont LO, and SMgt Toupin, Vermont OA, were asked to help. If anyone has a recruiting project that paid off, if anyone else has a recruiting project that needs help, share the ideas with other CAP units. Write it up and send it to HQ CAP-USAF/OIR. We will put it in the Bulletin Board of the CAP NEWS.

6. INFORMATION OFFICERS SHOULD RELEASE NEWS. Some unit IOs have been embarrassed in the past by having other members of the squadron call and ask you about the same news. You should lead your members (and members of other squadrons) to understand that you are the information officer and that you are responsible for coordination and release. If you are an officer, call your unit information officer, you will get busy and get out the news on time--while it is still new to the papers.

ADMINISTRATION

7. DATING COMMUNICATIONS. CAPR 10-1. "Written Correspondence and Messages," Attachment 1, gives a sample of the proper dating used in CAP as expressed in the CAP Communications Manual. When dates are expressed numerically, the same sequence is used: day, month, year (example: 10/12/75). This clarification of dating procedures will be included in CAPR 10-1 when it is revised.

8. NEW AND REVISED CAP PUBLICATIONS.

FOR THE EXECUTIVE DIRECTOR

I. BELL L. SNYDER, Lt Col, USAF
Director of Administration

In 1975 HQ CAP-USAF/OIR received many requests for sets of the CAP STORY slide presentation. We were unable to fill these requests. Because of the CAP-wide interest, we announced in the November issue of CAP NEWS Bulletin Board section that an updated CAP STORY was to be made available at $3.00 per set. A minimum of 350 orders was required to produce this briefing at this price. If there were not enough orders received by 1 January, your money would be refunded. The response has been appalling. To date, 21 requests have been received. We hope it's our bad timing in announcing this offer during the Thanksgiving and Christmas holiday season. We are extending the CAP STORY slide set offer to 31 March. Send your name and address and a MONEY ORDER for $3.00 per set to HQ CAP-USAF/OIR. This slide set with script is an excellent information tool. Fits conveniently in a pocket. Can be given to any audience, adult or young adults. If you want support from the local community, if you are interested in growing, if you want to spread the word about CAP, this is the information tool that will get the job done.
SUBJECT: SAR Mission--Success or Failure

TO: All CAP Pilots

Participation in a successful SAR mission is an extremely rewarding experience, and we in Civil Air Patrol are very fortunate to be an important part of this nation's SAR capability. All SAR missions do not, however, fit the category of rewarding or even successful. I'm not referring to those in which we fail to locate the objective. We can usually take a certain degree of pride in these missions simply because we tried and did our best.

The missions that are total failures are those that cost us an airplane and especially if injury or fatality occurs. We have had too many of these, which deeply disturbs me. For example, one of our pilots, who was to participate in a mission, departed an uncontrolled airport in early-morning semidarkness and fog. He was relatively inexperienced in actual instrument flight and had almost no instrument proficiency in the particular airplane he was flying. Add to this the fact that the aircraft was not adequately instrumented for actual IFR conditions. Nevertheless, he took off and successfully flew the airplane under these extremely adverse conditions--at least for about one-half mile beyond the end of the runway, where he crashed. He was killed and his passenger seriously injured. There are other examples, including more than one in which the pilot flew his aircraft into a position where he could not reverse course and the terrain ahead rose faster than the airplane was capable of climbing.

In this type of a situation, there is every possibility that one of the first thoughts in the pilot's mind was, "I can hack it, I think I can." It is only natural that pride in doing a job well and the desire to succeed will cause a pilot to try to perform at the limit of his capabilities. The result is that once in a while the pilot exceeds the limits of himself and his airplane with great finality.

I feel we must stop the occasional overaggressiveness which prompts a pilot to place his aircraft and, most importantly, himself into an unnecessarily hazardous situation. Let me hasten to add that I am not disagreeing that a proper level of aggressiveness is helpful. We certainly must have the enthusiastic, action-oriented type of approach that will get the job done. But, successful mission accomplishment depends upon exercising sound judgment along with the positive "can do" attitude.

To help exercise good judgment, every pilot should know the limits of his airplane and review them prior to each mission. He should also take time to reflect and make a mature judgment of his capabilities and respect the limitations that he recognizes. Let's all make a personal reassessment of what our capabilities are in the situations that we could be forced into. Let's don't say, "I can hack it," unless we are sure we can.

THOMAS C. CASADAY
Colonel, CAP
National Vice Commander
The reason we investigate accidents and incidents is to help prevent recurrence of similar type mishaps through management action and/or education based on findings. In this context, it's appropriate that all CAP members are periodically provided a review of the CAP accident experience. Henceforth, the “Safety Corner” will be published on a recurring basis and will provide a resume of selected CAP accidents--along with comments by the HQ CAP-USAF Director of Safety. Hopefully, awareness of the probable causes and circumstances surrounding CAP accidents will help prevent repetition of similar mishaps.

Last year there were thirty-one flight mishaps through 30 November. Twenty-two of these were judged to be pilot error, five were materiel failure, and four were classified as “other.” Six of the pilot error mishaps were because of depleting or mismanaging available fuel. The other sixteen were caused by incorrect technique/procedure as described below:

1. Student pilot lost control on roll-out in gusty winds.
2. Go-around landing.
3. Midair collision.
4. Hit power line on final approach.
5. Hit end of runway nose first (both pilots watching banner-towing plane).
6. Aborted takeoff because of gusty winds with insufficient runway remaining.
7. Buzzing.
8. Scraped prop tips on landing.
9. Stalled and crashed while making airdrop.
10. Lost control on landing roll-out (2).
11. Hit power lines during simulated forced landing.
12. Flew into deteriorating weather and forced to land on a very short grass runway; lost control on landing roll.
13. Failed to maintain adequate terrain clearance during search mission (2).
14. Landed in wrong direction relative to surface wind and scraped wing tip.

Comments. The above resume shows that, by far, the majority of accidents are caused by inattention to established procedures or just poor judgment. The four mishaps classified as “other” were, in fact, probably in the same category, but there was insufficient knowledge of the mishaps to identify them as such even though materiel failure was determined to be unlikely. The figures include only flight mishaps. Additionally, last year there were fourteen ground accidents through 30 November, of which ten were attributed to high winds and/or tie-down failures. These tie-down failures are of particular concern, because in no case has an airplane which was properly secured received wind damage. Proper tie-downs simply do not fail in moderate winds, and even helicopters can be secured to withstand 65-75 mph winds. tie-down requirements as outlined in CAPR 66-1 will prevent wind related ground accidents, but only if the prescribed tie-down facilities are available and properly used. Isn't it time we quit accepting these losses to high winds?
